### 3. Muscle Biology and Biochemistry

**Invited Speaker:** VALIN, C., MONIN, G., OUALI, A. and FERRA, M.: Muscle biology, post mortem muscle biochemistry and consumer meat acceptance

1. ANTON, M., GATELLIER, P. and RENERRE, M.: Microsomal lipid peroxidation in relation with oxidation of bovine myoglobin 320
2. BATJOENS, P., FIEMS, L.O., VAN HOOFF, J., VAN VOOREN, T. and VEREECKE, D.: Myofibre composition and metabolic aspects in different strains of Belgian white-blue bulls and their relation to meat colour 324
3. BIANCHI, E., CANTONI, A., CONSIGLIERI, C. and IPPOLITI, L.: The degradation of tripolyphosphate in the meat matrix 328
4. CEÑA, P., BELTRAN, J.A., JAIME, I. and RONCALES, P.: Degradation of several high molecular weight muscle proteins by calpains I and II mimics changes occurring throughout lamb meat aging 332
5. CEÑA, P., JAIME, I., BELTRAN, J.A. and RONCALES, P.: Post-mortem shortening of lamb Longissimus dorsi oxidative and glycolytic fibres as affected by temperature, muscle region and skeletal restraint; its relation to meat tenderness 336
6. DILBER-VAN GRIETHUYSEN, E. and KNIGHT, P.J.: Protein extraction from pig muscle in concentrated salt solutions 340
7. EGGEN, K.H. and BUER, W.E.: *Post mortem* changes of glycoconjugates in meat 344
8. ESSEN-GUSTAVSSON, B., KARLSTRÖM, K., LUNDSTRÖM, K. and PÖSÖ, R.: Adenine nucleotide breakdown products in muscle at slaughter and their relation to meat quality in pigs with different halothane genotypes 348
9. ESTRADE, M., ROCK, E. and VIGNON, X.: Ultrastructural *post mortem* changes in myofibrillar structure of normal and halothane sensitive pigs 352
10. GENOT, C., BORREL, M.N., METRO, B., GANDEMER, G. and RENERRE, M.: Enhancement of myoglobin autoxidation induced by phospholipids extracted from beef muscles of various metabolic types 356
11. GIL, M., GISPert, M. and SARRAGA, C.: Cathepsin D activity as an index of curing time for Spanish dry-cured ham 360
12. GRAAFHUIS, A.E., HONIKEL, K.O., DEVINE, C.E. and CHRYSTALL, B.B.: Tenderness of different muscles cooked to different temperatures and assessed by different methods 365
13. GUIGNOT, F., VIGNON, X. and MONIN, G.: Relationships between pH changes and extracellular space change in post mortem muscle of calf 369
14. HARTMANN, S., OTTEN, W. and EICHINGER, H.M.: Stress testing effects on blood lipid concentrations and organ lipid composition of different genotypes of swine 373
15. HEDRICK, H.B., FENNEWALD, K.J., BAILEY, M.E., HEYMANN, H., MAWHINNEY, T.P., CHANG, C.H. and WALLACE, D.H.: Effect of beta-agonists on composition of pork Longissimus muscle 377
16. HONIKEL, K.O. and POTTHAST, K.: Influence of age, sex, and feeding regimes of cattle on biochemical changes post mortem, sarcomere length and water-holding capacity of various muscles 382
17. IVASOV, V.I., BORISOVA, M.A., KHROMOVA, R.A. and SHNYROV, V.L.: The influence of polyphosphates having different chemical nature on the state of structure of myofibrillar proteins and collagen of intramuscular connective tissue of PSE pork. Part 1. The influence of different polyphosphates on myofibrillar proteins of PSE pork 386
18. IVASOV, V.I., BORISOVA, M.A., KHROMOVA, R.A. and SHNYROV, V.L.: The influence of polyphosphates having different chemical nature on the state of structure of myofibrillar proteins and collagen of intramuscular connective tissue of PSE pork. Part 2. The influence of different polyphosphates on collagen on intramuscular connective tissue of PSE pork 390
19. JOHANSSON, G., TORNBERG, E. and LUNDSTRÖM, K.: Meat colour in loin and ham muscles of normal meat quality from Hampshire, Swedish Landrace and Yorkshire pigs 394
20. KIVIKARI, R.: The effect of sample/water-ratio and added salt on the buffering capacity of meat 398
21. KLONT, R.E.: Effects of preslaughter anaesthesia on meat quality characteristics from pigs of different halothane genotypes 402
