

Organizing Committee

Chairman

Jorge A. Lasta

National Institute of Agricultural Technology, INTA

Vice-Chairman (Organization)

H. Ricardo Rodríguez

National Institute of Agricultural Technology, INTA

Víctor Tonelli

Argentine Beef Industry Association

Vice-Chairman (Scientific)

Pilar T. García

National Institute of Agricultural Technology, INTA

Secretary

Guillermo Sánchez

National Institute of Agricultural Technology, INTA

Members

Stella Alzamora

University of Buenos Aires, UBA

María C. Añón

University of La Plata, UNLP

Roberto Domenech

Argentine Association of Food and Beverage Industries, COPAL

Arturo Llavallol

Rural Argentine Society, SRA

Carlos López Saubidet

University of Belgrano, UB

Norma A. Pensel

National Institute of Agricultural Technology, INTA

Nélida Prola

National Institute of Industrial Technology, INTI

Daniel Rearte

National Institute of Agricultural Technology, INTA

Scientific Committee

Chairman

Pilar T. García

National Institute of Agricultural Technology, INTA

Members

Andrés Carden

National Institute of Agricultural Technology, INTA

Jorge J. Casal

National Institute of Agricultural Technology, INTA

Emilio Gimeno

Office International des Epizooties, OIE

Claudia B. González

National Institute of Agricultural Technology, INTA

Marcelo O. Masana

National Institute of Agricultural Technology, INTA

Herbert Ockerman

The Ohio State University, Ohio, USA

Eero Puolanne

University of Helsinki, Viikki, Finland

Ana Svensen

National Institute of Industrial Technology, INTI

A.A. Taylor

University of Bristol, Langford, United Kingdom

Christian Valin

Institute National de Recherche Agronomic, Paris, France

Noemí Zaritsky

University of La Plata, UNLP

Contents

OPENING LECTURE.	HOW MEAT DIVERSIFIES MEALS	19
	<i>Jorge Lasta and Norma A. Pense</i>	
SESSION 1.	MEAT AND MEAT PRODUCTS IN THE THIRD MILLENNIUM	
lectures L1	Research objectives and requirements in meat science and technology	24
	<i>C. Valin</i>	
SESSION 2.I.	ANIMAL PRODUCTION AND MEAT QUALITY	
lectures I-L1	Use of growth promoters in future production: one point of view	32
	<i>S.L. Boyles</i>	
I-L2	Hormonal growth promoters in meat production and differences in perception of acceptability for human consumers	38
	<i>H. Galbraith</i>	
I-L3	Gene expression in cloned transgenic cattle and swine	45
	<i>S. Stice</i>	
Round tables I-RT1	Anabolics, its technical and economical interpretation.	50
	<i>E. Gimeno</i>	
I-RT2	Expected genetic changes in pork production.	53
	<i>A.E. Carden</i>	
Posters I-P1	Stimuli for differentiation of myoblasts in culture vary between cell lines	54
	<i>P.P.Purslow</i>	
I-P2	Localization of preadipocytes in bovine muscle tissue	56
	<i>J. Wegner</i>	
I-P3	Influence of breed on bovine meat quality and palatability	58
	<i>J. Ciria</i>	
I-P4	Effect of breed and castration on muscle fibre type, cross-sectional area and meat tenderness in the beef cattle	60
	<i>A. Dalle Zotte</i>	
I-P5	Slaughter weight and breed group effects on consumer beef meat quality appraisal throughout ageing	62
	<i>C. Sañudo</i>	
I-P6	Carcass and meat properties of Holstein bulls and Holstein x Piemontese bulls and heifers	64
	<i>S. Cepin</i>	
I-P7	The effects of castration on carcass quality of grazing Hereford cattle	66
	<i>J. Franco</i>	
I-P8	Conjugated linoleic acid and poly-unsaturated fatty acids in intramuscular fat of Belgian blue bulls: effect of double-muscling	68
	<i>S. De Met</i>	
I-P9	Effect of the double-muscling genotype on carcass and meat quality in Belgian blue slaughter bulls	70
	<i>S. De Met</i>	
I-P10	Carcass and nutritive value as well as palatability of Holstein-Friesian and Red spotted young bulls during growth	72
	<i>E. Szücs</i>	
I-P11	Comparative analyses of proximal and fatty acid composition of grass-fed meat from water buffaloes (<i>Bubalus bubalis</i>) and zebu-influenced beef cattle at 24 months of age	74
	<i>S. Uzcátegui Bracho</i>	
I-P12	Carcass quality of savannah-fed zebu type cattle vs. water buffaloes serially slaughtered in Venezuela	76
	<i>N. Huerta-Leidenz</i>	
I-P13	Longissimus palatability of grassfed zebu type cattle vs. water buffaloes serially slaughtered in Venezuela	78
	<i>N. Huerta-Leidenz</i>	
I-P14	Comparison of carcass traits and meat quality characteristics of Simmental and Hereford x Belgian blue steers.	80
	<i>J.D. Morton</i>	
I-P15	Intramuscular and subcutaneous lipids in Bonsmara steers	82
	<i>P.T. García</i>	

Contents

2.I-P16	Lipid composition of intramuscular fat of beef from local spanish cattle breeds stored under modified atmosphere. <i>A. Purroy</i>	84
2.I-P17	Growth of skeletal muscle and IGF-I in pigs of different sex <i>M. Wicke</i>	86
2.I-P18	Interactive effects of the HAL and RN genes in crossbreeding <i>W. Przybylski</i>	88
2.I-P19	The effect of pig genotype and sex on raw material quality and technological traits of carso dry-cured hams <i>M. Candek-Potokar</i>	90
2.I-P20	The influence of carcass weight of fatteners with different HAL genotype on carcass leannes and selected traits <i>M. Kocwin-Podsiadla</i>	92
2.I-P21	Divergent selection on contractile properties of longissimus muscle fibers in the pig <i>B. Leuret</i>	94
2.I-P22	The effect of age and distribution of skatole levels in purebred boars in Sweden <i>J. Babol</i>	96
2.I-P23	Variation of boar taint compounds in backfat from divergent genetic lines <i>M. Hortós</i>	98
2.I-P24	The effect of RN genotype on the formation of two carcinogenic heterocyclic amines, MeIQx and 4,8-DiMeIQx in fried pork <i>V. Nilzén</i>	100
2.I-P25	Influence of breed on the collagen content in Longissimus dorsi of lamb <i>E. Mattos Monteiro</i>	102
2.I-P26	The effect of gender on meat quality of lamb Longissimus dorsi <i>R. Bickerstaffe</i>	104
2.I-P27	Variation in muscle composition between different commercial lamb types and its relationship with meat texture <i>P. Berge</i>	106
2.I-P28	Physical-chemical characteristic of Bergamácia and Santa Inés meat lambs, slaughtered at different weights <i>M.C. Bressan</i>	108
2.I-P29	Influence of mitochondrial function on growth and meat quality in turkey <i>M. Wicke</i>	110
2.I-P30	Microstructural parameters of the breast and thigh muscules, carcass and meat quality in the heavy type of turkey female <i>D. Klosowska</i>	112
2.I-P31	Effect of sex and strain on broiler chicken body lipids <i>P.T. García</i>	114
2.I-P32	Residue depletion of ivermectin, moxidectin and doramectin in cattle tissues <i>A. Fernández Suárez</i>	116
2.I-P33	Effect of formulation in liver and muscle residue levels for ivermectine. <i>A. Fernández Suárez</i>	118

SESSION 2.II. ANIMAL PRODUCTION AND MEAT QUALITY

Lectures

2.II-L3	Animal behaviour and meat quality in different systems <i>P. Le Neindre</i>	122
2.II-L4	Producing meat for healthy eating <i>M. Enser</i>	124

Round table

2.II-RT3	Beef from Argentine grass production systems. <i>P.T. García</i>	130
2.II-RT4	The influence of management on the poultry meat production. <i>M.H. Delaner</i>	131

Posters

2.II-P1	The use of vocalization scoring to monitor cattle handling quality in slaughter plants <i>T. Grandin</i>	132
2.II-P2	Effect of different stocking densities during transport on pig welfare <i>P.B. Gade</i>	134
2.II-P3	Microdialysis as a technique to determine extracellular metabolites in pig carcasses <i>P. Henckel</i>	136

84	II-P4	Influence of sex, male/female ratio and lairage time on carcass and meat quality of pigs.....	138
		<i>C. Santos</i>	
86	II-P5	The effect of strawbedding on the physiological response to preslaughter treatment, skin damage and carcass and meat quality in pigs	140
		<i>L. Faucitano</i>	
88	II-P6	Development of an ultra-filtration techniques for continuously monitoring blood glucose and lactate in broiler chickens	142
		<i>E. Lambooi</i>	
90	II-P7	Validation of urinary catecholamines as a stress indicator following electrical stunning	144
		<i>T. Lowe</i>	
92	II-P8	Effect of preslaughter heat stress, exercise or adrenaline injection on postmortem heat-stable pinkness, texture and water holding capacity in chicken	146
		<i>N.G. Gregory</i>	
94	II-P9	The effect a beta-agonist (zilpaterol) on meat colour shelf life	148
		<i>P.E. Strydom</i>	
96	II-P10	Existence of antibodies to various feed antigens in beef cattle and goats	150
		<i>M. Tanaka</i>	
98	II-P11	Carry-over of DNA-fragments from maize to laying hens and broilers	152
		<i>R. Poser</i>	
100	II-P12	Meat quality traits in lamb <i>M. Longissimus thoracis et lumborum</i> : the effect of pre-slaughter stress and electrical stimulation	154
		<i>R.D. Warner</i>	
102	II-P13	Influence of strategic maize grain supplementation on cholesterol and fatty acids of <i>Longissimus</i> and <i>Semitendinosus</i> muscles of beef steers at grazing	156
		<i>J.J. Grigera Naón</i>	
104	II-P14	Effect of feeding period on carcass and meat quality of dry cull cows	158
		<i>H.G. Bang</i>	
106	II-P15	Effect of grass and grain diets supplemented with vitamin E on the fatty acid composition of lipids from <i>Psoas major</i> steer muscles	160
		<i>P.T. García</i>	
108	II-P16	Volatile composition of beef as influence by forage and concentrate - based diets	162
		<i>P.A. Morrissey</i>	
110	II-P17	Study of toxicity of feed additives based on buckwheat hulls	164
		<i>A.I. Snitsar</i>	
112	II-P18	The effect of early weaning and intensive feeding on meat quality of beef cattle	166
		<i>P.E. Strydom</i>	
114	II-P19	Producing bright red pasture-fed beef	168
		<i>M.C. Lanari</i>	
116	II-P20	On farm effects on tenderness beef prediction	170
		<i>L. Pruzzo</i>	
118	II-P21	Effect of feeding system on daily gain of steers, fat and cholesterol content of beef	172
		<i>V. Schlinder</i>	
120	II-P22	Quality traits of organic Chianina beef (An italian experience)	174
		<i>M. Severini</i>	
122	II-P23	Effects of whole linseed and full fat soya included in a high concentrate diet and fed for 60 or 90 days on muscle fatty acid composition and meat quality in beef steers	176
		<i>N.J. Choi</i>	
124	II-P24	Fatty acid composition of <i>Longissimus</i> muscle of steers fattened under different feeding regimens	178
		<i>M.E. Cossu</i>	
126	II-P25	Effects of triple superphosphate supplementation on growth performance, carcass yield, heavy metals and fluorine levels in beef cattle on pasture	180
		<i>A. de Liguori Oliveira</i>	
128	II-P26	The effect of feeding regime on early post mortem biochemical indicators of beef quality	182
		<i>D.J. Troy</i>	
130	II-P27	Instrumental toughness of lamb from diverse european sheep types	184
		<i>C. Sañudo</i>	
132	II-P28	Effects of production systems on the fatty acids and flavour of lamb from six european countries	186
		<i>M. Enser</i>	
134	II-P29	Physical and sensory properties of lamb meat from northeast Brazil	188
		<i>J.F.F. Zapata</i>	
136	II-P30	Study on pH variation from meat of Corriedale male lambs raised in three nutritional systems	190
		<i>M.T.M. Osório</i>	

Contents

2.II-P31	Sensory meat quality in red deer (<i>Cervus elaphus</i>) grazed on pasture or red a commercial feed mixture <i>E. Wiklund</i>	192
2.II-P32	Is there an interaction between fat type and metal ion concentration in diets and warmed-over flavour (WOF) in pork? <i>M.C. Lanari</i>	194
2.II-P33	Subcutaneous fat quality of once bred gilts and nuliparous subjected to restricted feeding <i>L.R. Basso</i>	196
2.II-P34	Quantitative and qualitative characteristics of meat of pigs fed with protein-carbohydrate feed... <i>M.L. Faivishevsky</i>	198
2.II-P35	Effects of dietary restriction on the fatty acid composition of subcutaneous fat from barrows and gilts <i>P.T. García</i>	200
2.II-P36	Influence of nitrates on meat quality when fattening pigs for manufacture of baby foods <i>A.V. Ustinova</i>	202
2.II-P37	Analysis of dependence between some indicators of the meat quality in broiler chickens grown in different manners <i>S. Bogosavljevic-Boskovic</i>	204
<hr/>		
SESSION 3.I. PROCESSING AS REQUIRED FOR THE MARKET		
<hr/>		
Lectures		
3.I-L1	Safety criteria for minimally processed foods <i>Dr. T. Martens</i>	208
3.I-L2	Research priorities in fermented and dried meat products <i>K. Incze</i>	210
<hr/>		
Round table		
3.I-RT1	Use of lactic acid bacteria and their metabolites as biopreservatives for meat products. <i>G.L. De Antoni</i>	216
<hr/>		
Posters		
3.I-P1	Fat- and water-holding in low-fat mechanically deboned poultry systems as influenced by the different vegetable and non-meat protein added <i>D. Kazemekaityte</i>	218
3.I-P2	Possibilities of utilization of denitrifying microorganisms during manufacture of meat products <i>Y.G. Kostenko</i>	220
3.I-P3	Influence of starter cultures on sensory properties and biogenic amines concentration in "chorizo" <i>I. Jaime</i>	222
3.I-P4	Elaboration of a fermented meat product with <i>L. plantarum</i> using bovine plasma as a culture medium <i>J. Ruiz Ramírez</i>	224
3.I-P5	Formation of cured meat colour in meat model systems and fermented sausages by <i>Lactobacillus fermentum</i> strains (JCM1173 & IFO3956) <i>J.K.S. Møller</i>	226
3.I-P6	Effect of starter culture on flavour development of fermented sausages <i>K. Venema</i>	228
3.I-P7	The influence of the autochthonous starter cultures in the production of regional sausages - mechanical properties and sensorial evaluation <i>M. Elias</i>	230
3.I-P8	Muscle proteins hydrolysis by <i>Lactobacillus</i> isolated from dry sausages. Effect of curing conditions. <i>G.M. Vignolo</i>	232
3.I-P9	Role of <i>Penicillium aurantiogriseum</i> on the ripening: effect of the superficial inoculation and/or the addition of a intracellular cell free extract on the microbial and physico-chemical parameters of dry fermented sausages. <i>J.A. Ordóñez</i>	234
3.I-P10	Flavour compounds related to maturity of dried fermented sausage. <i>L.H. Stahnke</i>	236
3.I-P11	Proteolysis and lipolysis in an aseptic meat model system for dry sausages <i>E. Harnie</i>	238
3.I-P12	Analysis of aldehydes in dry sausage <i>M. Rokka</i>	240

192		Controlling bioflavour and safety in fermented meats products (FMP).....	242
	I-P13	Fair-CT97-3227 <i>D. Demeyer</i>	
194		Energetic aspects of ohmic cooking for processed meats	244
	I-P14	<i>G. Piette</i>	
196		Ohmic heating behaviour of processed meats	246
	I-P15	<i>G. Piette</i>	
198		Efficiency of dehydration of hides of the animals with natural zeolite under conditions of vibration.	248
	I-P16	<i>L.S. Kudryashov</i>	
200		The effect of different preparation methods on the formation of heterocyclic amines	250
	I-P17	<i>M. Gibis</i>	
202		Analysis of N-nitrosamines in a nitric oxide gas cured comminuted pork product	252
	I-P18	<i>C.M. Nichol</i>	
204		Prediction of H ⁺ concentration in frankfurters using neural network during cooking	254
	I-P19	<i>G.S. Mittal</i>	
204		Dependency of the fat content on the effective diffusion of water in raw sausage mass	256
	I-P20	<i>H. Damm</i>	
208		Technology of curing and fumeless smoking of chicken carcasses	258
	I-P21	under conditions of hydro-pulsed effects <i>L.S. Kudryashov</i>	
210		Intermediate moisture meat product. Evaluation of dehydration and adsorption processes in charqui meat	260
	I-P22	<i>C.E. Rocha Garcia</i>	
216		Design of composition and properties of special meat semi-prepared products	262
	I-P23	<i>N.A. Chulkova</i>	
220		About a problem of modelling of currents of food viscous-plastic media	264
	I-P24	<i>A.I. Stepanenko</i>	
224		Improvement in the functional properties of sausages by addition of biopolymers	266
	I-P25	prepared from soybean protein and milk protein using microbial transglutaminase <i>M. Muguruma</i>	
228		Assessment of the effects of b-lactoglobulin, tapioca starch and added water on the physical and textural properties of low-fat fresh pork sausages using response surface methodology	268
	I-P26	<i>J.F. Kerry</i>	
232		Factors determining consistency in the dry-cured ham	270
	I-P27	<i>S. Tyszkiewicz</i>	
236		Influence of meat cut, slice thickness and direction of muscle grain	272
	I-P28	on the properties of beef stir-fry slices <i>P.J. Shand</i>	
240		Isolation of food protein from blood of slaughter animals	274
	I-P29	<i>E.A. Evstafyeva</i>	
244		Studying the possibility of manufacture of high-quality canned meat	276
	I-P30	products from low-grade beef treated with enzyme preparation <i>A.B. Lisitsyn</i>	
248		Enzymatic hydrolysis of protein of meat at use new bio- of a drug	278
	I-P31	<i>V.G. Boreskov</i>	
252		Properties and perspectives of a new proteolytic preparation	280
	I-P32	from hydrobionts in technological processing of the meat raw materials <i>L.V. Antipova</i>	
256		Fermentative hydrolysis as the effective way of obtaining	282
	I-P33	the base for disease-preventive drinks <i>L.V. Antipova</i>	
260		Meat cut and injection level affects the tenderness and cook yield of processed roast beef	284
	I-P34	<i>J.A. Boles</i>	
264		Studies on the processing technology of goose ham sausage	286
	I-P35	<i>G. Yin-yu, C. Cai-shui</i>	
268		Polyfactoral protection of smoked sausages	288
	I-P36	<i>I.A. Rogov</i>	
272		Role of staphylococci in the oxidation of free fatty acids	290
	I-P37	<i>R. Talon</i>	
276		Studies on the processing technology and quality control for nanan pressed salted duck	292
	I-P38	<i>C. Cai-shui, G. Yin-yu</i>	
280		Effect of selected herbs on pH of raw sausage	294
	I-P39	<i>M. Milanovic-Stevanovic</i>	

Contents

3.I-P40	Study of composition of volatile components of far eastern balsams and their effect on taste and aromatic properties of uncooked smoked meat products <i>A.I. Zharinov</i>	296
3.I-P41	Volatile compounds during ripening in italian dried sausage <i>L. Stahnke</i>	298
3.I-P42	Characterisation of mediterranean and north europe fermented meat products: chemistry and oxidative stability aspects <i>R. Chizzolini</i>	300
3.I-P43	Intensification of processing technology of russian traditional raw sausages <i>V.I. Lubchenko</i>	302
3.I-P44	Effect of altering pH on the colour of stimulated and non-stimulated loin muscles from 300 day grain-fed cattle <i>G. Trout</i>	304
3.I-P45	Enhancement of color formation in meat products by milk protein hydrolysates <i>R. Sakata</i>	306
3.I-P46	Color stability and spoilage characteristics of chicken meat patties prepared with thigh meat from various rinse and additive treatments <i>J.C. Acton</i>	308
3.I-P47	Color and sensory characteristics of beef patties formulated with tomato paste and sundried tomato powder <i>J.C. Acton</i>	310
3.I-P48	Curing agents effect on color properties in pork lean meat during vacuum dehydration process <i>E. Sayas Barberá</i>	312
3.I-P49	Paprika effect on colour parameters and reflectance values in spanish-type sausages during resting stage <i>M.R. Rosmini</i>	314
3.I-P50	Influence of non-meat ingredients and marination of raw material on the physical and chemical characteristics of low-fat ground beef patties <i>P. Becker Siqueira</i>	316
3.I-P51	Studies on developing low fat emulsified meatballs. <i>S.Y. Hsu</i>	318
3.I-P52	Comparative study of fatty acid composition of the nutritionally modified cooked meat sausages <i>K. Broce</i>	320
3.I-P53	Histological examination of snail meat specialities <i>I. Steinhäuserová</i>	322
3.I-P54	The brazilian dried meat sector: a rapid agri-sector analysis (rasa approach) <i>F.M. de Mello Bliska</i>	324
3.I-P55	The meat sectors and the brazilian economy: an interregional input-output approach <i>F.M. de Mello Bliska</i>	326
3.I-P56	Characterization of a superoxide dismutase-deficient mutant and a catalase-deficient mutant in <i>Staphylococcus xilosus</i> . <i>C. Barrière</i>	328

SESSION 3.II. PROCESSING AS REQUIRED FOR THE MARKET

Lectures

3.II-L3	Grading systems. Yield and meat quality, evaluation on line <i>A. Lebert</i>	332
3.II-L4	Measurement and simulation tools to assist with the automation of carcass disassembly <i>R. Clarke</i>	338

Round Tables

3.II-RT2	Beef and pork carcass grading systems in Brazil <i>E.T. Facco Silveira</i>	344
----------	---	-----

Posters

3.II-P1	In vivo estimation of carcass quality in Merino lambs and wethers <i>F. Bidinost</i>	346
3.II-P2	An anatomically accurate model of a lamb carcass <i>J. Bell</i>	348
3.II-P3	Effect of slaughter weight on carcass composition and commercial cuts of yearlings of seven beef breeds <i>P. Alberti</i>	350

296	I-P4	Composition and quality of reindeer (<i>Rangifer tarandus tarandus</i> L) carcasses	352
		<i>E. Wiklund</i>	
298	I-P5	Carcass characteristics of once bred gilts and nuliparous for pork production	354
		<i>L.R. Basso</i>	
300	I-P6	Growth of carcass traits of beef cattle on the grassland in Argentine	356
		<i>H. Harada</i>	
302	I-P7	Relation between cold carcass weight and tissue depth in gr site.	358
		Effect of breed and sex in pure and crossbred heavy lambs of 5 months age	
		<i>G. Bianchi</i>	
304	I-P8	Meat performance of chinese yellow cattle	360
		<i>L. Liu</i>	
306	I-P9	A beef carcass classification by on-line image analysis	362
		<i>A. Lebert</i>	
308	I-P10	Lamb classification systems to meet uruguayan export market demands	364
		<i>G. de los Campos</i>	
310	I-P11	Legal requirements on stunning and slaughter in twenty eight countries	366
		<i>N.G. Gregory</i>	
312	I-P12	Current profiles during electrical stunning	368
		<i>N.G. Gregory</i>	
314	I-P13	Assessment of electrical and mechanical stunning of farmed eel (<i>Anguilla anguilla</i> , L.)	370
		<i>E. Lambooij</i>	
316	I-P14	A novel method for quantitative fat analysis in meat by in vivo Magnetic Resonance Imaging	372
		<i>A. Högberg</i>	
318	I-P15	Study on bone formation age and the optimum fattening age of Japanese Black cattle	374
		<i>T. Oshida</i>	
320	II-P16	The use of near infrared spectroscopy to determine fat content	376
		and fatty acid composition in beef meat	
		<i>O. Dotrepppe</i>	
322	II-P17	Image analysis techniques for evaluation of meat yield indicators of bovine carcass	378
		<i>J.M. Zamorano</i>	
324	II-P18	Evaluation of ultrasound prediction in korean beef cattle carcass value	380
		<i>S. Young-Han</i>	
326	II-P19	What kind of predictors for calibrating the pig classification methods	382
		<i>G. Daumas</i>	
328	II-P20	Predicting lean meat yield of australian pig carcasses	384
		<i>H. Channon</i>	
330	II-P21	On farm effects on lean beef meat yield prediction	386
		<i>V. Schindler</i>	
332	II-P22	Imaging of meat structure by ultrasonic and magnetic resonance	388
		<i>S. Abouelkaram</i>	
334	II-P23	Ultra - Fom 300 the new equipment for after slaughter meatness evaluation of pork carcasses	390
		<i>T. Bicharski</i>	
336	II-P24	Video imaging of beef carcasses and the problem of category dependent estimation formulae	392
		<i>W. Branscheid</i>	
338	II-P25	Evaluation of meat quality in fresh and frozen hams	394
		<i>M. Ordóñez</i>	
340	II-P26	Instrumental color classification of veal carcasses	396
		<i>R. Klont</i>	
342	II-P27	Distance assessment in automated butchery by means of microwave sensing	398
		<i>J.L. Damez</i>	
344	II-P28	Improvement of processing technology for broiler chickens and laying hens	400
		<i>S.I. Khvylyya</i>	
346	II-P29	Combined effects of aitch bone suspension and chilling rate on the tenderness of beef muscles ..	402
		<i>O. Sorheim</i>	
348	II-P30	Preparation of clean livestock for slaughter: effect of crutching practices	404
		on the microbiological quality of lamb carcasses	
		<i>J. Bobbitt</i>	
350	II-P31	Impedance and pH development in pork with different	406
		slaughter treatment and its relation to driploss	
		<i>A. Schäfer</i>	
352	II-P32	Observations on how weasand clips and rings enter petfood	408
		<i>N.G. Gregory</i>	
354	II-P33	Color parametres evolution during washing process of mechanically deboned poultry meat	410
		<i>J.A. Pérez-Alvarez</i>	

Contents

3.II-P34	Quality loss in mechanically deboned poultry meat at different storage temperatures <i>M.A. Trindade</i>	412
<hr/>		
SESSION 4.I.	BIOCHEMISTRY AND FUNCTIONAL PROPERTIES OF MEATS	
<hr/>		
Lectures		
4.I-L1	Titin and tenderness <i>M.L. Greaser</i>	420
<hr/>		
Round Tables		
4.I-RT1	Modelling of the cooking process effect on protein denaturation and beef hardness <i>N. Zaritzky</i>	424
4.I-RT2	Effectiveness of combined-tenderization processes in tough muscles <i>C.B. González</i>	425
<hr/>		
Posters		
4.I-P1	Degradation and release of titin in pork muscles <i>E. Pospiech</i>	426
4.I-P2	Texture and collagen characteristics of major beef muscles <i>G. Torrecano</i>	428
4.I-P3	Effect of endurance exercise on intramuscular collagen characteristics in goats <i>N. Shiba</i>	430
4.I-P4	Age related changes in breast poultry meat collagen crosslink, hydroxylslypyridinium <i>M. Shimokomaki</i>	432
4.I-P5	Influence of sarcomere length on the reduction of myofilament lattice spacing post-mortem and its implication on drip loss <i>A. Schäfer</i>	434
4.I-P6	Muscle structure influenced by age on Chianina beef <i>F. Nicastro</i>	436
4.I-P7	The effect of electrical simulation on the tenderness of beef - an investigation of proteolysis and meat quality <i>A. Göransson</i>	438
4.I-P8	Effect of chilling methods on meat tenderness from light veal carcasses <i>E. Pospiech</i>	440
4.I-P9	Effect of rigor temperature and shortening on meat tenderness of lamb <i>T. Lowe</i>	442
4.I-P10	Improving beef tenderness by restricting rigor mortis contraction <i>K.I. Hildrum</i>	444
4.I-P11	Effect of calcium chloride injection and postmortem aging on bovine Biceps femoris muscle tenderness <i>V. Salitto</i>	446
4.I-P12	Meat tenderization by calcium chloride after osmotic dehydration <i>A. Suzuki</i>	448
4.I-P13	Cow beef tenderness enhancement through supersonic shock wave treatment <i>N.G. Marriott</i>	450
4.I-P14	Inhibition of protease activity 1. The effect on tenderness and myofibrillar fragmentation <i>D.L. Hopkins</i>	452
4.I-P15	Inhibition of protease activity 2. Examination of myofibrils using light and electron microscopy <i>D.L. Hopkins</i>	454
4.I-P16	Evaluation of enzyme extract from chicken viscera as a tenderizer on spent hen breast <i>C. Ming-Tsao</i>	456
4.I-P17	Changes in beef structural and physicochemical properties by endogenous enzyme activity <i>M.L. Pérez-Chabela</i>	458
4.I-P18	The effect of exogenous m-calpain on the mechanical properties of single muscle fibres extended to fracture <i>M. Christensen</i>	460
4.I-P19	Calpain activity in a cultured muscle cell line is increased by adrenaline <i>P. Erbjerg</i>	462
4.I-P20	Postmortem changes in the calpain system in five porcine muscles <i>P. Erbjerg</i>	464
4.I-P21	Drip contains significant levels of proteolytic enzymes <i>P.P. Purslow</i>	466
4.I-P22	Biochemistry of meat tenderization during postmortem aging: association with calpain 3 (p94) <i>R. Bickerstaffe</i>	468

412	P23	Post-mortem ageing and tenderness classification of rib steaks from grass-fed senepol crossbred bulls <i>A. Rodas-González</i>	470
420	P24	Does postmortem proteolysis depend on fibre type distribution? <i>M. Christensen</i>	472
424	P25	Changes in lipids bound to myofibrils and I-Z-I fraction related to myofibrillar ATPases activities and MFI of ovine Longissimus dorsi stored at 2-4°C <i>M.A. Ojeda</i>	474
425	P26	The influence of product handling on postmortem tenderization of beef: duration of aging influences <i>L.E. Jeremiah</i>	476
426	P27	The influence of product handling on postmortem tenderization of beef: postmortem treatment influences <i>L.E. Jeremiah</i>	478
428	P28	Sarcomere length as indicator of tenderness in bovine M. Longissimus dorsi exposed to different post mortem treatments <i>R. Rødbotten</i>	480
430	P29	Predicting the tenderness of beef using pH-measurements early post-mortem <i>A. Göransson</i>	482
432	P30	Anisotropy and postmortem changes in the dielectric properties of Semitendinosus muscle <i>A. Clerjon</i>	484
434	P31	Effect of physical treatments on digestibility and allergenicity of beef extract <i>A. Suzuki</i>	486
436	P32	Study of possibility of steady emulsion production on the base of the plant protein <i>L.V. Antipova</i>	488
438	P33	Antihypertensive peptides from enzymatic hydrolysate of porcine myosin <i>K. Arihara</i>	490
440	P34	Immunochemical detection of egg-white antigens in processed food products <i>J.L. Vendevore</i>	492
442	P35	Detection of added animal and plants ingredients in canned tuna meat <i>V. Meret</i>	494
444	P36	Immunochemical detection of animal species in processed meat products <i>V. Meret</i>	496
446	P37	Species meat differentiation by polymerase chain reaction - restriction fragment length polymorphism analysis <i>I. Steinhäuserova</i>	498
448	P38	Kinetic patterns of fermentative hydrolysis of waste animal products <i>A.V. Berdutina</i>	500
450	P39	Study of possibility of obtaining chemically bound complexes of meat and vegetable proteins <i>Y.E. Kalinova</i>	502
452	P40	Production of edible casings, functional ingredients biomaterials on the basis of controlled biomodification of collagen proteins of animal tissues <i>L.V. Antipova</i>	504
454	P41	Metmyoglobin reducing activity and colour stability of ovine Longissimus muscle <i>A.E.D. Bekhit</i>	506
456	P42	Quality evaluation of spanish comercial categories of ostrich meat <i>J. Fernández-López</i>	508
458	P43	Beef, horse and goat meat quality: calorimetry, functional and electrophoretical analysis <i>M-L. Pérez-Chabela</i>	510
460	P44	Color measurements and tenderness relationships in ten retail beef cuts <i>A.B. Picallo</i>	512
<div style="display: flex; justify-content: space-between;"> <div style="width: 10%; vertical-align: top;">460</div> <div style="width: 85%;"> <p>SESSION 4.II. BIOCHEMISTRY AND FUNCTIONAL PROPERTIES OF MEATS</p> </div> <div style="width: 10%; text-align: right;">460</div> </div>			
462	-L2	Oxidation, shelf-life and stability of meat and meat products <i>G. Bertelsen</i>	516
464	and tables -RT3	The relative contribution of protein vs. lipid and meat vs. microbes to flavour development in dry and fermented sausage <i>D. Demeyer</i>	526
466	-RT4	Diversity of meats, diversity of stability requirements <i>N. Penseel</i>	527

Contents

Posters			
4.II-P1	Lipid oxidation in cooked meat emulsions. Development of a response surface model.....	528	-P2
	<i>M.A. Judis</i>		
4.II-P2	Interaction of malonaldehyde (a byproduct of lipid oxidation) with myofibrillar proteins of sea salmon (<i>Pseudoperca semifasciata</i>). <i>V.A.Tironi</i>	530	-P3
4.II-P3	Studies on the content of cholesterol oxides in heated meat products.....	532	-P4
	<i>K.O. Honikel</i>		-P5
4.II-P4	Effect of tocopherol addition on secondary lipid oxidation products in irradiated ground beef.....	534	
	<i>W.P.Hanson</i>		-P6
4.II-P5	Tbars analysis in pressurized and heat-treated poultry	536	
	<i>M. Mor Mur</i>		-P7
4.II-P6	Use of modified tall oil and vitamin E to improve pork longissimus muscle quality.....	538	
	<i>J.A.Unruh</i>		-P8
4.II-P7	Sous vide cooked beef muscles: effects of low temperature-long time (LT-LT)..... treatments on their sensory characteristics and oxidative stability during storage. <i>G. Sánchez</i>	540	-P9
4.II-P8	Effect of the dietary enrichment with animal fat and vitamin E..... on rabbit meat shelf-life and sensory properties. <i>A. Dalle Zotte</i>	542	-P10
4.II-P9	Argentine beef: antioxidants and colour stability during refrigerated retail display.....	544	-P11
	<i>N.A.Pensel</i>		
4.II-P10	Oxidative stability of argentine beef during ninety days of storage: supra-nutritional supplementation with vitamin E on grain and pasture production. <i>N.A.Pensel</i>	546	-P12
4.II-P11	Concentrations of anserine and carnosine in poultry meat extracts treated with demineralization and papain. <i>J.Chun-Chin Kuo</i>	548	-P13
4.II-P12	Antioxidants application for prevention of rancidity development in chicken refrigerated breast meat using response surface methodology. <i>A.L.Soares</i>	550	-P14
4.II-P13	Antioxidative effect of soya bud in model systems.....	552	-P15
	<i>M. Judis</i>		-P16
4.II-P14	Argentine beef: lipid and protein oxidation and its relationship with natural antioxidants during refrigerated retail display. <i>E.M.Insani</i>	554	-P17
4.II-P15	The effects of natural antioxidants on the quality characteristics of beef patties packaged in modified atmosphere. <i>A.Sánchez</i>	556	-P18
4.II-P16	Ability of some natural antioxidants in combination with vitamin C to increase the oxidative stability of beefsteaks packaged in modified atmosphere. <i>D. Djenane</i>	558	-P19
4.II-P17	Antioxidant enzymes activity in Psoas major beef muscle from different production systems.....	560	-P20
	<i>A.A.Descalzo</i>		-P21
4.II-P18	Antioxidant status and lipid oxidation in fresh Argentine beef from pasture and grain-fed steers with vitamin E supra-nutritional supplementation. <i>A.A.Descalzo</i>	562	
<hr/>			
SESSION 5. MEAT QUALITY: CONSUMER DEMANDS			
<hr/>			
Lectures			
5-L1	Consistency in meat quality.....	566	
	<i>R.K.Miller</i>		
5-L2	Newer methods in sensory analysis	582	
	<i>W.J. Harper</i>		
<hr/>			
Round tables			
5-RT1	Identifying future market demands using sensory evaluation.	590	
	<i>G.E.Hough</i>		
5-RT2	Aroma of fresh and processed meat assessed by an electronic nose.....	591	
	<i>G.M.Grigioni</i>		
<hr/>			
Posters			
5-P1	Pork flavour – A nordic project which aims to identify consumer response to pork flavour.....	592	
	<i>H. Agerhem</i>		

528	22	Sensory properties and consumer preference of characterising flavour compounds of sheepmeat <i>L. O'Neill</i>	594
530	23	Variability in eating quality attributes of Australian pork <i>H. Channon</i>	596
532	24	Consumption preferences for different kinds of meat: lamb's place. <i>M. Mc Cormick</i>	598
beef..... 534	25	Sensory characteristics and volatile compounds in beef from young bulls and heifers of pirenaica and friesian breeds. <i>M.J. Beriain</i>	600
536	26	Physicochemical and sensory characterisation of a typical Spanish cooked blood sausage called "Morcilla de Burgos". <i>E.M. Santos</i>	602
538	27	Sensory characteristics and acceptability of Argentine "paleta" <i>M.M.Gallinger</i>	604
540	28	Argentine "bondiola": sensory characteristics and acceptability by the consumers. <i>M.M.Gallinger</i>	606
542	29	Effect of vitamin E-supplemented feed regimen on beef odour assessed by a conducted polymer sensors based electronic nose. <i>G.M. Grigioni</i>	608
544	30	Prediction of technological and organoleptic properties of beef cuts by near infrared spectroscopy. <i>A. Clinquart</i>	610
546	31	Variation in surface color of hanwoo (Korean native cattle) beef as influenced by light intensity of display condition. <i>L. Sung-Ki</i>	612
548	32	Consumer evaluation of the use of pH 5H P.M. as a predictor of meat quality. <i>H. Agerhem</i>	614
550	33	Toxicological and sensorial benefit of cysteine addition to hamburger. <i>A. Schoch</i>	616
552	34	Vitamin D3 and 25-OH vitamina D3 in raw and cooked pork loin. <i>I. Clausen</i>	618
554	35	Relationship between contents of cholesterol, and fat in meat cuts. <i>K.O. Honikel</i>	620
556	36	Survey on microbiological and bromatological quality of different brands of frozen hamburguers collected in three retail markets of Maracaibo, Venezuela. <i>Q.K.Parra</i>	622
558	37	Lipids and cholesterol in pork muscles. <i>P.T. García</i>	624
ms..... 560	38	Effect of animal fatness on meat fatty acids composition and its relation with the saturated fatty acid/polyunsaturated fatty acid ratio as a nutritive parameter of beef quality. <i>M.J. Beriain</i>	626
562	39	Sanitary-hygiene evaluation of reindeer meat as raw materials for production of child nutrition products. <i>N.N. Lipatov</i>	628
21	40	Evaluation of food adequacy of reindeer meat to nutritional requirements of infants. <i>N.N. Lipatov</i>	630
566	41	Meat products and health of Russian population. <i>A.B. Lisitsyn</i>	632
<hr/>			
SESSION 6.I.		MEAT SAFETY	
582	L1	Use of microorganisms in non-traditional methods to increase meat safety. <i>M.P.Doyle</i>	636
<hr/>			
and tables			
590	RT1	Emergent pathogens in meat and poultry: Brazil and the world. <i>I. Delazari</i>	640
591	RT2	Difficulties that industry has to face to adopt non-traditional methods. <i>E.D. Sanjurjo</i>	641
<hr/>			
P1			
592	P1	Protective cultures inhibit growth of <i>Listeria monocytogenes</i> and <i>Escherichia coli</i> O157:H7 in cooked, sliced, vacuum- and gas-packaged meat. <i>A. Holck</i>	642

Contents

6.I-P2	A bioprotective culture for sliced and vacuum-packed meat product.....	644
	<i>N.N. Terra</i>	
6.I-P3	Bioprotection: an additional safety hurdle.....	646
	<i>L.Andersen</i>	
6.I-P4	Changes in microflora and myofibrillar proteins of raw chicken breast inoculated with bioprotective cultures.....	648
	<i>E. Ponce Alquicira</i>	
6.I-P5	Bacteriocin-based biopreservatives control growth of pathogenic and spoilage bacteria in vacuum-packaged refrigerated low-heat processed meat products.....	650
	<i>B. Ray</i>	
6.I-P6	Growth of <i>Brochothrix thermosphacta</i> and <i>Lactobacillus sakei</i> strains in refrigerated vacuum-packaged meats.....	652
	<i>G.M. Vignolo</i>	
6.I-P7	Several bacteriocins enhance the bactericidal effect of high hydrostatic pressure against foodborne pathogens in a meat model.....	654
	<i>J.M. Monfort</i>	
6.I-P8	Complete destruction of <i>Listeria monocytogenes</i> in hot dog by hydrostatic pressure and bacteriocin-based biopreservatives.....	656
	<i>B. Ray</i>	
6.I-P9	High pressure processing of cooked poultry sausages: inactivation of enterobacteria and lactic acid bacteria.....	658
	<i>M. Mor Mur</i>	
6.I-P10	Screening of antimicrobials against <i>Listeria monocytogenes</i> in pork bologna.....	660
	<i>J.N. Sofos</i>	
6.I-P11	Automated turbidimetry to estimate injury of <i>Salmonella newport</i> cells after irradiation in frozen poultry.....	662
	<i>M.O. Masana</i>	
6.I-P12	Shelf-life of organic acid treated vacuum packed chicken breast meat.....	664
	<i>A.J. Christiane de Vasconcelos</i>	
6.I-P13	Packaging of ground beef in an atmosphere with high carbon dioxide and low carbon monoxide restrains growth of <i>Yersinia enterocolitica</i> , <i>Listeria monocytogenes</i> and <i>Escherichia coli</i> O157:H7.....	666
	<i>T. Nesbakken</i>	
6.I-P14	Shelf life evaluation of refrigerated vacuum packaged beef kept for extended storage.....	668
	<i>H.R. Rodriguez</i>	
6.I-P15	Microbiological studies of value-added pork products.....	670
	<i>H. Haines</i>	
6.I-P16	Descontamination of swine carcasses with chlorine.....	672
	<i>A.S. Barreto</i>	
6.I-P17	Decontamination of pig carcasses.....	674
	<i>T. Jensen</i>	
6.I-P18	The influence of Glutamal bioactive, on the carcasses of lamb and pig using the surface spraying method.....	676
	<i>A. Stolle</i>	
6.I-P19	Preparation of clean livestock for slaughter: effect of cleaning practices on the microbiological quality of beef carcasses.....	678
	<i>D. Rowland</i>	
6.I-P20	Microbiological aspects of ovine pelt removal assisted by air inflation.....	680
	<i>M. Severini</i>	
<hr/>		
SESSION 6.II	MEAT SAFETY	
<hr/>		
Lectures		
6.II-L2	Predictive microbiology for the meat industry.....	684
	<i>J. Baranyi</i>	
6.II-L3	Risk analysis; theory and reality.....	690
	<i>P. Sterrenburg</i>	
<hr/>		
Round tables		
6.II-RT3	Risk of extrapolation in predictive microbiology models.....	696
	<i>M.O. Masana</i>	
6.II-RT4	Assessment of hygiene and sanitary control systems in international meat trade.....	697
	<i>C. Hermida</i>	

644	P1	A recurrent neural network for modelling the growth of <i>Listeria monocytogenes</i> in dynamic conditions. <i>A. Lebert</i>	698
646	P2	Growth of mixed cultures of <i>Listeria</i> and <i>Pseudomonas</i> spp. in beef meat and their prediction using polynomial models. <i>I. Lebert</i>	700
648	P3	Modeling <i>E. coli</i> O157:H7 survival in uncooked, semi-dry, fermented sausage. <i>S. Barbut</i>	702
650	P4	Microbiological profile and hazards of traditional sausage from Trás-os-montes. <i>C. Martins</i>	704
652	P5	Prevalence of shiga toxin-producing <i>Escherichia coli</i> (STEC) in stool samples from staff of meat processing companies. <i>R. Pichner</i>	706
654	P6	Detection of shiga toxin producing <i>Escherichia coli</i> by PCR in beef cattle at slaughtering level in Argentina. <i>H.R. Rodriguez</i>	708
656	P7	Elimination of verotoxigenic <i>Escherichia coli</i> O157:H7 from a specialised beef-producing herd. <i>E. Borch</i>	710
658	P8	Effect of preslaughter feeding system on gut bacteria in cattle. <i>N.G. Gregory</i>	712
660	P9	Assessment of the hygienic characteristics of the beef slaughter and dressing process and prevalence of <i>E. coli</i> O157:H7 in a small slaughterhouse in Zulia State, Venezuela. <i>L. Arenas de Moreno</i>	714
662	P10	PCR detection and typing of <i>Campylobacter jejuni</i> and <i>Campylobacter coli</i> in poultry meat. <i>V. Atanassova</i>	716
664	P11	The prevalence of <i>Campylobacter</i> and <i>Aerobacter</i> in turkey and poultry meat. <i>C. Ring</i>	718
666	P12	Tracing of <i>Salmonella</i> spp. in pork slaughtering and cutting plants using serotyping and macrorestriction genotyping. <i>J.L. Vendevore</i>	720
668	P13	<i>Salmonella</i> finding in a slaughtering and cutting plant. <i>A. Stolle</i>	722
670	P14	Contamination routes of pathogenic <i>Yersinia</i> spp. in pig slaughter and cutting. <i>E. Borch</i>	724
672	P15	Occurrence of <i>Salmonella</i> in meat and meat products in Brazil. <i>R. Bronberg</i>	726
674	P16	Bacteria pathogen changes in fresh pork after storage and consumer abuse. <i>G.C. Smith</i>	728
676	P17	Changes in pathogenic bacteria counts during limited abuse of fresh pork. <i>G.C. Smith</i>	730
678	P18	Estimation of microbiological quality of chilled aged beef using automated turbidimetry. <i>M.O. Masana</i>	732
680	P19	Comparison of indicators for microbial quality of meat during aerobic cold storage. <i>M. Lee</i>	734
684	P20	Poultry can be thawed safely on the counter at ambient temperature. <i>S.M. Jiménez</i>	736
688	P21	Intermediate moisture meat product. Evaluation of botulinal toxin production in charqui meat. <i>J.A.F. Lara</i>	738
692	P22	Diagnostic sensitivity/unsensitivity of trichinoscopy (compression) and artificial digestion of pooled samples. <i>M. Daney</i>	740
<div style="display: flex; justify-content: space-between;"> SECTION 7 PACKAGING </div>			
684	1	Commercial applications of active packaging and biosensor technology in meat packaging – A packaging manufacturer's perspective. <i>J. Belcher</i>	744
690	2	The status and potential for edible biodegradable packaging films. <i>J.C. Acton</i>	748
<div style="display: flex; justify-content: space-between;"> and Tables </div>			
697	T1	The use of edible films and coatings to preserve meat quality. <i>M.N. Marino</i>	752
699	T2	Properties of plastic materials from soy, chickpea and beans. <i>E.M. Salmoral</i>	753

Contents

Posters			
7-P1	The protection of meat products by polymer coatings.....	754	
	<i>E.I. Titov</i>		
7-P2	Addition of antioxidants to packaging films to extend the shelf life of fresh beef.....	756	
	<i>M.A. Finkle</i>		
7-P3	Extending the shelf life of fresh beefsteaks packaged in modified atmosphere by UV-free lighting.....	758	
	<i>D. Djenane</i>		
7-P4	Effect of carbon monoxide and argon in sliced turkey meat under modified atmosphere packaging (preliminary assays).....	760	
	<i>A.S. Barreto</i>		
7-P5	Improving the shelf life of chicken portions using modified atmosphere packaging.....	762	
	<i>E.M. Buys</i>		
7-P6	The effect of modified atmosphere packaging and vitamin E dietary supplemented on the microbiology and colour stability of beef mince from vacuum stored wholesale cuts.....	764	
	<i>E.M. Buys</i>		
7-P7	Detection of oxygen in commercially packaged beef systems using oxygen sensors: impact of detected oxygen on dietary α -tocopheryl acetate supplemented and control beef.....	766	
	<i>J.P. Kerry</i>		
7-P8	A strategy for minimizing proportion of over- and under- weights in minimum-weight-packaged chicken breast fillets.....	768	
	<i>L.L. Young</i>		
7-P9	Inhibition of anaerobic/facultative pathogen growth in meat by high level carbon-monoxide modified atmosphere.....	770	
	<i>V. Tsemakhovitz</i>		
7-P10	Extension of meat shelf-life by high level carbon-monoxide modified atmosphere.....	772	
	<i>N. Shaklai</i>		
SESSION 8.		TEACHING AND RESEARCH IN MEAT SCIENCE AND TECHNOLOGY.	
Lectures			
8-L1	Focusing on practical knowledge of meat science and technology.....	776	
	<i>H.W. Ockerman</i>		
8-L2	Using Internet for training the meat science community; ECCEMST's experience.....	780	
	<i>F.J.M. Smulders</i>		
Round tables			
8-RT1	Futures demands in capacitation in meat science and technology.....	786	
	<i>M.C. Añon</i>		
8-RT2	Meat hygiene training programmes in Argentina.....	787	
	<i>A.A. Silvestre</i>		
Posters			
8-P1	Teaching of hygiene and food safety in small and medium size meat industries.....	788	
	<i>M.R. Rosmini</i>		
SESSION 9.		MEAT QUALITY REQUIREMENTS.	
Lecture			
9-L1	Meat quality requirements today and in the next ten years in different world markets.....	792	
	<i>A.D. Gordon</i>		
SESSION 10.		TRACEABILITY	
Lecture			
10-L1	Traceability from farm to consumption.....	798	
	<i>E.P. Cunningham</i>		
SESSION 11.		ANIMAL WELFARE AND ENVIRONMENTAL IMPACT OF MEAT PRODUCTION AND PROCESSING.	
Lecture			
11-L1	Consumer concerns.....	804	
	<i>N.G. Gregory</i>
